#### **Experience Overview**

Kevin McCrackin is currently providing consulting services to a number of clients with regard to energy services, including gas supply acquisition, mobile LNG, CNG and RNG gas services, pipeline development, combined heat & power installation and energy management.

Previously, Kevin has extensive industry experience in both regulated utilities and unregulated energy companies.

The regulated utilities included DTE Energy Gas (formerly Michigan Consolidated Gas), Washington Gas Light and AGL Resources (including Atlanta Gas Light, NICOR, Virginia Natural Gas, Florida City Gas, Chattanooga Gas and Elizabethtown Gas). Within these organizations, he has held numerous responsibilities, including business development, gas supply acquisition and hedging, sales and marketing, construction services, field operations and regulatory affairs. At these organizations, Kevin was also responsible for large customer relationship management (ex. Ford, General Motors, Chrysler, Marathon Oil, International Paper, General Services Administration of the Federal government, etc.).

Kevin has been involved in a number of start-up energy companies, energy services operations and natural gas infrastructure projects, including New Fortress Energy (1st LNG plant in Florida), UtiliPRO Home Services, Portland Natural Gas Transmission pipeline, Vector Pipeline, Millennium Pipeline, Washington 10 Natural Gas storage, AGL Energy Services, AGL Biogas operations and MichCon Home Services.
